

LESSON
5

Geometric Figures

Practice A: Congruent Figures

Are there any congruent figures in each picture? If there are, describe them.

1.

2.

3.

4.

5.

6.

Determine the unknown measure in each set of congruent polygons.

7.

8.

9.

10.

right triangle

parallelogram

Problem Solving

- | | |
|--------------------|-----------|
| 1. one-way sign | 2. 1,080° |
| 3. school crossing | 4. 60° |
| 5. B | 6. H |
| 7. D | 8. F |

Reading Strategies

- 4
- Possible answer: the pattern in the list
- 5
- 6

Puzzles, Twisters & Teasers

- | | |
|---------|---------|
| 1. 37° | 2. 60° |
| 3. 110° | 4. 118° |
| 5. 50° | 6. 30° |

C U R T A I N S

Answers for Lesson 5

Practice A

- Yes; the spokes on the wheel are congruent.
- Yes; the half-circles are congruent.
- yes
- yes
- no
- no
- 15 cm
- 38°
- 105°
- 21 ft

Practice B

- The short stripes are congruent, the stars are congruent, and the long stripes are congruent.
- There are no congruent figures in the picture.
- yes
- no
- no
- yes
- 52 in.
- 12 cm
- 116°; 25 m
- 55°; 6 ft

Practice C

- No congruent figures in the picture
- The two small triangles are congruent, and the two larger triangles are congruent.
- yes
- no
- 34°; 12 in.
- 84°; 11 cm
- 99°; 16 ft
- 52 ft; 105°
- Two hexagons are congruent if corresponding sides and angles are equivalent.

Review for Mastery

- | | |
|--------------------|-----------------|
| 1. \overline{EF} | 2. $\angle HEF$ |
| 3. \overline{CD} | 4. $\angle CBA$ |
| 5. 100° | 6. 7 in. |
| 7. 9 in. | |

Challenge

- | | |
|-------------|-------------|
| 1. KNE | 2. EN, DY |
| 3. Kennedy | 4. RR, AH |
| 5. NO, IS | 6. Harrison |
| 7. OO, CL | 8. ED, IG |
| 9. Coolidge | |

Problem Solving

- Yes, they are both rectangles and both 94 ft by 50 ft.
- No, they are not the same size.
- No, they are not the same size.
